Sepsis 2020: linking Experts in Sepsis

CO-CHAIRS: **John Marshall**, *Toronto Canada*
Christopher Seymour, *Pittsburgh, USA*

The Sepsis 2020 Symposium will address the diagnosis, epidemiology, science and clinical management of sepsis, including COVID-19

While we can't be together this year, our virtual symposium will provide a unique opportunity to hear from and engage with international-thought leaders from the fields of critical care, infectious diseases, internal medicine and surgery, who have extensive expertise in the clinical care, science and laboratory investigation of sepsis and the host response, and in the design, conduct and interpretation of clinical trials conducted to investigate the treatment of sepsis.

In response to the COVID-19 pandemic Sepsis 2020 has been reimagined to provide an innovative event where registered participants will be able to collaborate and join discussions focusing on the clinical aspects of sepsis as well as the management of sepsis and a comprehensive update on ongoing clinical trials.

The Sepsis 2020 will be held 24-25 August, and we invite you to join us for this year's event. Registration will be available shortly and is complimentary.

The Vision of the International Sepsis Forum is to reduce the global burden of morbidity and mortality from sepsis.
